n URAUNIUM BACKUP - FREE! If you will want to save any document or program into the Program file folder of the main drive, you must run a program on the PC to create it. Find, highlight, and then copy the entire path of the disk to the clipboard. If you are running Windows XP, Vista, or Windows 7, you can right-click a shortcut and choose Properties. This will open up the Properties box for the shortcut. This is usually done when you are going to install something on your hard drive. You can then paste the path into the Add or Remove Programs window in the Control Panel. If you are using Windows 7, then you can either do this by typing the path into the search bar or by right-clicking the shortcut and choosing Properties. You will now be able to locate the shortcut for the Program Files folder. You can then drag and drop the shortcut into the Program Files folder and it will automatically replace the old shortcut. If you are using Windows Vista or Windows XP, then you need to remove the shortcut by deleting it. To delete a shortcut, highlight the shortcut and then press Delete to remove it. To remove the shortcut, highlight it in the taskbar, right-click, and choose Delete. Once you have placed the shortcut in the program files folder, you can then run the URAUNIUM BACKUP - FREE! program to restore the deleted file. You can then easily move it back to the drive where you normally store your document or program. For example, if you have it stored in the directory C:\Program Files\FINAL FANTASY XI, you can simply copy the shortcut to your desktop and drag and drop it into the FINAL FANTASY XI folder. If you are using Windows Vista or Windows XP, you can simply go to Start, All Programs, FINAL FANTASY XI and then double-click it to run the program. Once you have the Program Files folder in place, you can then run the URAUNIUM BACKUP - FREE! program to scan and scan your drives for backup. You can then select the drive that contains the drive that you want to backup. Click the Start button to run the program and wait for it to finish. Once the program is finished, you can then select the drive that you want to backup. Press the Start button to run the program and wait for it to finish. Once the program is finished, you will be given the option to backup a drive or multiple drives. 82157476af
