About This Content

Nusakana 2nd Anniversary artbook is a collection of unpublished drawings and arts posted in various blogs and website during the development of the game from its start at 2013 to 2015. This is by no means a proper artbook with polished art, but rather more of a collection of various illustration by the game graphic designer, num, whether it is serious or parody in nature.

This release is to commemorate 2 year of Nusakana release.
